About Us

Copper 360 Ltd is growing big in copper mining, based in the Northern Cape. We're working hard to develop one of the world's largest copper districts.

We believe in treating everyone fairly and equally at Copper 360. Our team comes from all kinds of backgrounds, and we're committed to making a workplace where everyone feels welcome and can do well.

Come join our lively team, where working together is the key to achieving big things. We're not just hiring workers; we're putting together a group of people who are dedicated and know that success comes when we all work together. If you're a team player who loves doing great work, we want your skills to complete our team. Let's create a future full of new ideas and success together.

Job Description

COPPER 360 LTD has a permanent position available for a Mining Engineer to be based at our mine in Nababeep.

The Mining Engineer job purpose is to plan, design and optimise mining operations to ensure the safe, efficient and cost-effective extraction of mineral resources. The Mining Engineer is responsible for developing mine plans and schedules, monitoring mining performance, optimising production, managing technical projects, and providing engineering expertise to achieve operational objectives while ensuring compliance with legislative, safety and environmental requirements.

The person will report to the Mining Manager.

Key Responsibilities

- Mine Planning and Design.
- Production Optimisation.
- Technical Engineering Support.
- Project Planning and Capital Development.
- Resource and Reserve Support.
- Compliance and Risk Management.
- Cost Management.
- Reporting and Technical Documentation.
- Health, Safety and Environment Responsibilities.
- Leadership and Continuous Improvement.

Preferred Qualifications

- Bachelor's Degree in Mining Engineering.
- Registration with the Engineering Council of South Africa (ECSA) as a Professional Engineer or Candidate Engineer will be advantageous.
- Mine Manager's Certificate of Competency (Metalliferous Mines) will be advantageous.

Preferred Experience

- Minimum 5 years' experience in underground hard rock mining.
- Experience in mine planning and scheduling.
- Experience with mine design software.
- Experience in production optimisation and technical project management.

Knowledge and Skills required

- Mine planning.
- Underground mine design.
- Production optimisation.
- Engineering analysis.
- Resource planning.
- Cost analysis.
- Project management.
- Technical reporting.
